AIRQUIP + PIPETOOL PTY LTD

QBox EF Welder

QBox Electrofusion Welder:

QBox—the next generation electrofusion control box

Features:

Screen;

- Practical: hard-wearing, scratch-resistant polycarbonate.

- Flexible: true graphic display accommodates full range of international character sets. Eighteen languages currently supported including Chinese, Russian and Polish.

- Performance: high contrast, greater legibility.

User interface;

- Control: Status bar remains on the screen at all times during the fusion process.

Keypad membrane;

- Longevity: seamless membrane. Reduced risk of moisture penetration.

- Safety: hi-visibility reduces risk of site damage.

Casing;

- Performance and durability: die-cast aluminium casing incorporating large cooling fins ensures high duty cycle performance.

Protective frame;

- Resilient: powder coated.

- Practical: carrying handle and cable store.

Connections and Data Retrieval;

- Flexibility: printer socket, scanner socket, USB connector, SD card port.

- Capacity: stores up to 2000 joints.

- Reassurance: SD card acts like an aeroplane's black box. Almost indestructible data security.

Versatile: User Control Interface can be set to any of 18 different languages!

Key specifications

- Power: 110V or 220/230V versions available
- Output: 80Amps
- IP rating: IP54
- Designed in accordance with ISO 12176 Part II and GIS ECE 1
