

WT Pipe Clamp

The Weld-Tech Family: 4 Clamps ranging from 1" through to 14"

Weld Tech Pipe Clamp Range

Hold it steady while I...

Due to its unique design the WT Clamp ensures that the clamping forces are evenly spread round the pipe because the distance between the clamping points are exactly the same. The arms are made of cast aluminium which allows a clamping force to meet the requirements for all pipe dimensions and wall thicknesses up to 15 mm. The adjusting bolts have stainless steel balls at their ends. This eliminates contact corrosion on stainless steel pipes.

Popular: The WT28, 2" through 8"

Part No.	Size Range
WT125:	1" - 2 1/2"
WT26:	2" - 6"
WT28:	2" - 8"
WT612:	6" - 14"
